

TECHNICAL DATA SHEET

Grade: PRO-AID J101

Our J101 Process Aid can be used for opaque products such as sheet, film, bottle, pipe, fittings, profile etc.

Main Characteristics

- Low Molecular Weight
- Fast fusion rate
- Improved productivity
- Improved processability

Main Property

Bulk density	0.35 g/cc
Volatile matter	Max 1% wt %

Countertype to K120/K125/PA210/310/PA-910

The above results are typical values and do not constitute a specification.
