

TECHNICAL DATA SHEET

Grade: PRO-AID J201

Our J201 Process Aid can be used in foam/ expanded products such as sheet and pipe.

Main Characteristics

- Medium Molecular Weight
- Fast Fusion rate
- Decreased processing temperature

Main Property

Bulk density	0.37 g/cc
Volatile matter	Max 1% wt %

Countertype to K415, P530, PA600, PA828, 30 FD

The above results are typical values and do not constitute a specification.
