

## **TECHNICAL DATA SHEET**

Grade: PRO-AID J301

Our J301 Process Aid can be used in foam/ expanded products such as sheet and pipe.

### Main Characteristics

- High Molecular Weight
- Fast Fusion rate
- Decreased processing temperature

### Main Products

Bulb density      0.37 g/cc  
Volatile matter    Max 1 wt%

Countertype to K435 / PA610 / PA630

The above results are typical values and do not constitute a specification.
